Product Bulletin: Device Support 2.4 Released

Surrey, BC - Efficient Building Automation Corporation has released the Device Support 2.4 installation package, available immediately.

Device Support Version 2.4 includes a number of enhancements to Circon Catalyst® graphical programming editor for LNS (used to create and edit programs for the UHC-400), and the UHC-400 controller's XIF and plug-ins.

Note: The UHC-400 and the Catalyst programming editor are only supported on LNS. Niagara^{AX} support will be included in a future version.

As well, a new firmware image for the VAV-332 controller platform (m14) containing a number of improvements to the device firmware is now available, along with support for Niagara 3.7 for the Circon AX Wizards.

For further information, please consult the release notes included with the install set, or contact your technical support/sales representative to obtain the release notes via soft copy.

Availability, Ordering, and Pricing Information

Device Support 2.4 is now available through download from EBAC's FTP site or via CD by issuing a purchase order for the following part number:
